

Name: _____

Make a Solar Still

You Will Need:

- Large bowl
- Plastic cup
- Plastic wrap
- Rock
- Cup of salty water
- Rubber Band

1. Pour salty water into bowl.

2. Place the plastic cup in the middle of the bowl.

3. Tightly cover the bowl with plastic wrap and use a rubber band or tape around the rim of the bowl to keep it airtight.

4. Finally, place the rock in the center of the plastic wrap over the cup.

Have you ever tasted salt water?

Can you drink it?

If you were lost on an island with only salt water available, how could you drink it?

After Making Solar Still

What conclusions did you come to? - _____
